

Fire Hazard Abatement

PREPARE NOW & PROTECT FROM WILDFIRE

Be proactive by using a Ventrac to reduce the amount of combustible material surrounding your structures. Super stable on steep slopes and slides up to 30

degrees, plus the ability to get into tight spaces, gives a Ventrac the edge over an ordinary tractor. Whether you're looking to remove underbrush, mow down tall grasses or take it

clear down to the dirt, Ventrac has the attachments you need to get the job done right and reduce wildfires from spreading.
